# DKEY BANK
Network Tokenomics

DKEY Token Overview

DKEY Bank is an ecosystem that empowers users to be in control of their finances by creating crypto-based passive income and harnessing the potentials of Decentralized Finance technologies. To achieve this level of user experience, DKEY Bank had developed a whole new way of utilizing the current financial product on the crypto and traditional market. Instead of executing each financial product individually, DKEY Bank focuses on the functionality of the blockchain and dedicating it specifically to deliver a greater financing experience in the Decentralized Finance market, DKEY Bank provides unparalleled high transaction throughput, reduced risk of errors, and development geared towards user experience for the best financial services with blockchain.

Token Distribution Based on Max Supply

●	Seed	20.00%
●	Asset & liquidity	20.00%
●	Vault reward	19.99%
●	Community	10.00%
●	Team	10.00%
●	Private round (remain)	17.00%
●	Private round 1	1.00%
●	Private round 2	1.00%
●	Supernode	1.00%
●	Others	0.01%

Token Lock Up Schedule

Tokens awarded to DKEY supporters in early (Private) rounds are not liquid upon launch. To ensure network security and stability, these tokens can be staked. All staked tokens earn reward based on the amount they staked.

Early DKEY supporters purchased the token to support the network via an agreement for future tokens upon project launch.

There are total of 20 Private Round, each round consists of 1,000,000 Unit of DKEY. Prices vary based on time of investment, price increase after each round is completed.

Token Allocation	Purchase Price	Total Locked Period
Private Round 1~20	$ 0.30 ~ TBA	1 Year
Vault Reward	-	1 Year
Asset & Liquidity	-	1 Year
Community	-	1 Year
Team	-	2 Year
Seed Round	$ 0.10	2 Year

DKEY Tokenomics

DKEY Token is created using Binance Smart Chain (BEP-20) Smart Contract. It is pre-mined with a total supply of 100,000,000 DKEY.
DKEY is the native-token of the protocol and is used for both staking and governance. When DKEY tokens are staked as collateral, they generate synthetic units – which are pegged to the demand of the DKEY Bank ecosystem. Binance Smart Chain is optimized for ultra-fast transaction speeds and crossed-chain compatibility. It enhances DKEY (Token) scalability and reliability as a settlement unit in DKEY Bank. Furthermore, DKEY network is dependent and running on Binance, involving and sharing the largest cryptocurrencies liquidity in the world.

DKEY Launch Beta Version APP

The launch of Beta Version of DKEY Bank App comes with staking and swap functions of DKEY Token are enable for early DKEY supporters to try out and experienced DKEY Bank while the app is ready for live release in the short coming months.

Token Details

Token Symbol : DKEY

Standard : BINANCE SMART CHAIN BEP-20

Category : DEFI

Total Supply: 100,000,000 DKEY

Contract : 0xf3ed4770e6efe9168c3f2f50a6d9d0f97a550df1

Private Sales Price : Start from $0.30

Listing Price : $1.00

Accepted Currencies : BTC, ETH, BNB, BUSD & USDT

DKEY BANK Vaults

DKEY Bank creates 4 types of financial services called "Vaults". These vaults are Swap, Staking, Lending, and Mining. In traditional financial terms as Exchange, Investment, Loan/Borrowing, and Fixed Deposit respectively.
DKEY Bank creates liquidity capital pools that automatically generate yield based on opportunities present in the market. Vaults benefit users by socializing gas costs, automating the yield generation and rebalancing process, and automatically shifting capital as opportunities arise. End users also do not need to have proficient knowledge of the underlying protocols involved or DeFi, thus the Vaults represent a passive-investing strategy.

Staking

DKEY token holders can easily stake their tokens in DKEY Bank App and earn rewards. Staking adds security to the network and maintaining the stability of the platform development stage. Supporters are given rewards during post launch of the Beta Version of DKEY Bank.

Proof-of-Use Required Staking

The minimum required staking term on DKEY BANK APP is 365 days. At least 20% of tokens need to be staked in order for Proof of Use requirement to be satisfied. Staking Rewards can be calculated using the rewards calculator on the DKEY BANK APP.
